

Human Osteology Viewer Instructions

Step 1

Select a bone category. For example, click Arm to see arm bones.

Step 2

Select a specimen's code. For example, click D-18 to see specimen D-18's arm bones.

Step 3

Some specimens have more bones than others. For example, D-18 has five pictures. Click on each number to see associated bone.

Step 4

Select a viewer to view the bone. For example, there are Anterior View and Posterior View for these bones.

Step 5

Click "Open Picture" to view the full screen picture in a new tab. The picture can then be downloaded to your computer for measurement.
